NARROW SPOT INFRARED THERMOMETER

Model : TM-910

FEATURES	
* Useful instrument to measure the surface temperature of small size & narrow spot target, such as IC, transistor, coil, transformer...	* Separate probe, easy operation. & remote measurement.
* Non-contact temperature measurement, wide range from - 10 °C to 300 °C (14 °F to 572 °F), wide temperature measuring for general applications.	* Super large LCD display, easy readout.
* 0.1 °C/0.1 °F resolution.	* Heavy duty & compact housing case.
* °C, °F display unit, select by front push button.	* Records Maximum and Minimum reading with recall.
* Emissivity value can adjust from 0.10 to 0.95. A factory preset emissivity value to 0.95, which will cover 90% of a typical application.	* Data hold.
* Microprocessor circuit assures max. possible accuracy, provides special functions & features.	* Operates from 006P DC 9V battery.
	* Build the RS232 serial interface output. If the meter connect the Personal Computer via the RS232 cable & install the software, then whole system will be used as the "DATA LOGGER", "DATA RECORDER" or other kinds modern temperature measuring system.
